Aangan Studio · Voice Agent — Components Map

Actor	Trigger	Input	Context	Processing	AI	Output
Customer (Website visitor)	Clicks “Enquire”, types name, email and phone	Speaks: project, area, size, timeline, decision-maker				
Voice Agent (Vaani)			Agent prompt + live free slots + typed caller details	Asks one question at a time, qualifies, reserves a slot		
System (Studio backend)		Slots sync: free times from Cal.com into the agent		Webhook verifies, stores transcript + recording		Rubric scores the lead (no AI), then books the slot in Cal.com
AI Model (Gemini)					Gemini extracts fields, 5-line summary and the agreed slot	
Services (Cal.com, Resend, HubSpot)						Cal.com invite, emails to designer + customer, HubSpot deal
Designer (Studio team)						Dashboard: callers, prep card, recording, transcript
